📁 PROJECTS

Full-Stack Fitness & Progress Tracker

- Designed and developed a responsive web application for tracking gym workouts, progressive overload, and fitness goals.
- Built a dynamic frontend using **React** and established a secure backend using **Node.js** and **Express.js**.
- Implemented data persistence and user management with **MongoDB Atlas**, optimizing schema design for fast queries.

Hotel Reception Management System

- Engineered a desktop application for managing hotel room bookings, guest check-ins, and billing processes.
- Developed a clean user interface using **C#** and **Windows Forms**, ensuring intuitive navigation for reception staff.
- Integrated a local database system to handle structured data storage and perform efficient CRUD operations.

Vector Graphics Modeling Application

- Designed and implemented a desktop application for creating and manipulating 2D geometric shapes (circles, rectangles, custom donuts) utilizing **Java** and OOP principles.
- Developed an interactive user interface allowing users to dynamically add, modify, resize, color, and layer multiple graphic elements on a canvas.
- Applied clean code practices and design patterns to manage application state and ensure smooth architectural scaling.

"Sound~Wave" Enterprise Information System Model

- Engineered a comprehensive system model and organizational framework for a modern music production house, optimizing business processes across multiple studios.
- Developed detailed system architecture and workflow documentation using **UML diagrams** to map out studio resource scheduling and talent onboarding pipelines.
- Designed the conceptual database schema and data flows to streamline tracking of production phases from initial tracking to final master delivery.

🧠 SKILLS

Languages & Frameworks

JavaScript, React, Node.js, Express.js, Java, C#, C

Databases

MongoDB, SQL

Tools & Platforms

Git, GitHub, Visual Studio, VS Code, Eclipse

🎓 EDUCATION

Bachelor of Science in Information Systems Engineering

Faculty of Technical Sciences, University of Novi Sad

10/2024 – Present | Novi Sad, Serbia

- Gained a solid foundation in computer architecture, networking, and object-oriented programming.
- Developed practical projects utilizing statistical data analysis, relational databases, and software testing principles.

High School Diploma – Specialized IT Department (Computer Science)

Gymnasium "Jovan Jovanovic Zmaj", Novi Sad

09/2020 – 06/2024 | Novi Sad, Serbia

- With an advanced, specialized curriculum focused on mathematics, programming, and computer science.
- Acquired early algorithmic thinking and fundamental coding principles through intensive hands-on lab work.
